

# Commercialising Low Carbon Technologies

advanced  
manufacturing park

Seminar - Thursday 27th November

Innovation Technology Centre,  
Advanced Manufacturing Park (AMP)  
Near Sheffield (M1 Junction 33)

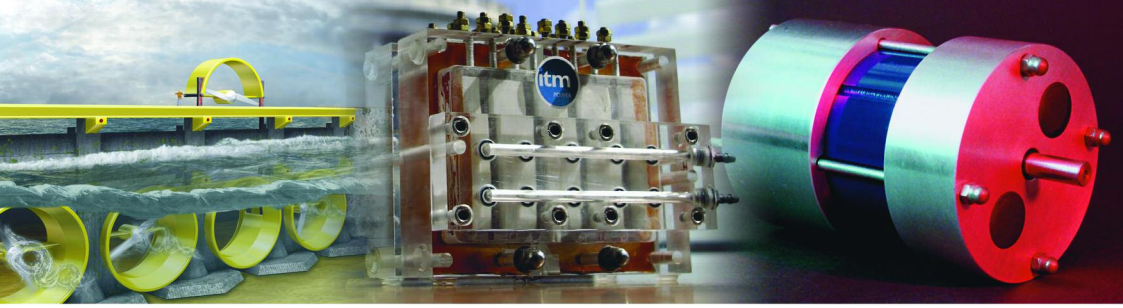

This one day event will be invaluable for those currently developing low carbon technologies and looking to take the technology to the next stage.

The event is organised by LIFE-IC and the Advanced Manufacturing Park (AMP) team on behalf of Yorkshire Forward.

Attendees will be able to;

- Learn about the LIFE business accelerator and its proven process to assist with the commercialisation of early stage low carbon technologies.
- Gain insight into the key areas of low carbon technology development and the support available through the new Environmental Energy Technology Centre (EETC) at the AMP.
- Hear firsthand experiences from LIFE's client companies, both about working with LIFE and being located at the AMP.
- Discover the world class facilities available for early stage/startup companies at the EETC.
- Learn about the low carbon economy strategy for the Yorkshire region.
- Discuss your requirements with specialists from the organisations involved in this project.

## Timetable

**9:15-10:00** Registration

**10:00** The low carbon economy (Stephen Brown – Yorkshire Forward)

**10:20** The development of low carbon technologies (Philip Johnson – LIFE IC)

Process – The LIFE business accelerator

Case studies:

- MCD Engines (novel rotary engine technology, proof of concept stage)
- Pulse Tidal (tidal generation technology, scale demonstrator)
- ITI Energy (gasifier technology, commercial sales)

**12:00** Lunch

**13:00** Introduction to the Advanced Manufacturing Park (Chris Scholey – AMP)

The Environmental Energy Technology Centre (EETC):

- An iconic alternative energy building
- Facilities available for companies at the EETC

**14:00** ‘Drop In Service’ for those who wish to discuss matters further (LIFE IC)
